

The correct dose

Hygiene solutions for floors and surfaces

A large, dynamic splash of clear water is the central focus, with a blue butterfly perched on the right side of the splash. The water droplets are captured in mid-air, creating a sense of movement and freshness. The background is a soft, light blue gradient.

Soludoz
Solucaps

Solucaps

Safe, fast and easy to

Attach the product sticker to the trigger spray bottle

Fill with 700ml of water (to the mark)

Remove one Solucaps from the tub

Put one Solucaps into the spray bottle

Shake, and the solution is ready to use

No cutting
No measuring
No piercing
No contact with the concentrated product

No over dosing
Cuts out the time spent measuring

Works instantly

Trigger spray can be re-used several times

one dose

Soludoz

use thanks to the measured dose system

The unrivalled performance of the Soludoz and Solucaps range is the result of many years of research. Today they bring the best product solutions to the professional hygiene market.

Soludoz and Solucaps are a great technological breakthrough, combining active powder and totally water-soluble packaging.

They meet all your requirements; take up less storage space and are easy to transport, measure dosage and use.

Place the unopened sachet into a bucket of water 5 or 10 litres

Stir, and the solution is ready to use

innovative idea :
of powder, completely soluble in water

for choosing the

simple **more economical** **faster**

Each dose corresponds to the exact amount of powder needed for any use.

- ◆ 1 dose for 1 bucket of 8 – 10 litres or 5 litres of water.
- 1 dose for a spray containing 700ml of water.

Simple presentation and packaging.

- ◆ A convenient robust dispenser with instruction for use and containing labels for the spray.
-

Reduced storage space and transport costs.

- ◆ A much more concentrated solution than 5 litre containers. One tub (14cm high, 20cm diameter) provides 1,000 litres of solution.
- 1 box of Solucaps takes up 11 times less space than normal sprays.

Reduced personnel training time, thanks to the product's ease of use.

Total control of costs, as waste is eliminated: thanks to the precise doses there is no over dosage causing waste, nor under dosage, causing products to work less efficiently. No time wasted measuring.

Easy to transport between areas.

- ◆ Sachets used for distribution.
 - 20 doses in one tub with labels.
- Products are concentrated, so lighter for the user to transport.

excellent reasons

SOLUDOZ and SOLUCAPS solution

more practical *safer* *kinder to the environment*

Works instantly.

◆ Add one sachet to a bucket of water; the sachet and powder dissolves at once.

● Add one trigger capsule to the filled trigger spray, and shake; the solution is ready to be sprayed directly onto the surface to be treated.

Eliminates the risk of over dosage, avoiding damaging your floors and surfaces thus prolonging their life.

The packaging shows clearly the intended use of the product.

◆ In a tub marked with the product description and a pictogram showing the instructions for use.

● In spray form, product description and pictogram showing the instructions for use.

No harmful waste: the sachet dissolves completely, thanks to its composition (polyvinyl alcohol).

● Trigger spray can be reused many times.

No risk of splashing or contact with the concentrated product.

Easy to use

Soludoz
